Thank you for your recent enquiry about courses offered by the Open Training and Education Network (OTEN). Further information is available on the OTEN website www.oten.edu.au, under International Students.

Some OTEN courses may not be suitable for study from overseas, as they involve attendance at practicals, face-to-face workshops, completion of work placement or supervision by an appropriate qualified supervisor in Australia. These additional activities may have charges which are not included in the individual unit tuition fee. Please note, study with OTEN does not qualify you for an entry visa into Australia.

The cost of a unit is based on its number of hours, as detailed in the Course Information Leaflet for the course. Units are charged at $15 AUD tuition fee per unit hour. You are able to apply and pay for one or more units as you progress through your course. If you wish to enrol, you need to send in your full payment for each of the units you nominate, with your enrolment application.

Hourly tuition fees for International Students living overseas are reviewed regularly. The fees current at the time of your unit enrolment must be paid. Payment must be in Australian dollars by:

- bank cheque, bank draft or International Money Order made payable to OTEN,
- direct deposit (you will need to enquire if your bank charges a transfer fee and include this in $AUD in addition to the module/unit tuition fees) or
- credit card (Visa, MasterCard).

We recommend that you discuss the units and course with the OTEN teaching section before making your decision to enrol. To gain the award for the course in which you are enrolled you must complete all the units required for course completion within the time specified under Duration in the Course Information Leaflet.

TAFE PLUS Short Courses are not charged by unit tuition fees. They have set commercial fees, which are indicated on the TAFE PLUS Course Information Leaflet.

If you are an Australian citizen or an Australian Permanent Resident living overseas, the information above does not apply to you.
