Welcome to the Maths Section at OTEN

In our section we offer the commercial courses “Bridging Maths”, course number 22235A and the Statement of Attainment course “Preparatory Maths and Science”, course number 6509. We run the maths subjects in courses from CGVE, HSC, Preparation for Vocational and Further Study and Engineering courses. If you are studying a course in TAFE NSW, we can also support you in the maths components of that course through the Learning Support Program, course number 9999.

Every teacher in our section is highly qualified in teaching maths by distance. We can even teach you geometry over the phone! And we’ve all studied by distance ourselves so we know how to look after you. We know some great tips about how to learn maths and how to prepare for maths exams.

If you have any questions you’d like to ask us, give us a call on 9715 8581 if you’re in Sydney or 1300 369 598 otherwise. You can also email us at oten.maths@tafensw.edu.au

We hope you enjoy studying maths at OTEN.
