Hello and welcome to OTEN’s Pest Management section.

Thanks for taking an interest in the range of courses we have on offer.

In our Pest Management section we provide courses that teach the skills and knowledge required to carry out a range of pest management tasks.

Our courses can provide students with the qualifications required to obtain pest management and fumigation licences from NSW WorkCover. Our Timber Pest Inspection course satisfies the insurance industries study requirements for providing cover for Timber Pest Inspections and Treatments. We also offer Certificate level courses and specialised courses in specific pest management fields.

We can also provide a large range of courses and subjects that you can complete in order to satisfy the pest management industries Continued Professional Development program – while also working toward obtaining an additional recognised qualification.

Depending on the courses you enrol in, your studies will incorporate a mix of written assignments and practical tasks, field work and practicals, study via course notes, texts, CD’s, online and in the workplace.

Good luck with your pest management career and don’t hesitate to get in touch with a pest management teacher if you are unsure which course suits your needs.
